VariAir Display

Applications at www.varia-uk.com

VariAir Display is an exclusive, creative and modern way to decorate your facade, wall, showroom or board for visual merchandising.

VariAir Display consists of many small PVC plates that are attached with pins to a board. The PVC plates are moving in the wind and reflect the light, creating a vibrant sparkling effect.

Pictures, artworks, logos, advertising texts, etc. can be implemented in a variety of colours and finishes. Weather-resistant and on demand flame retardant they can be used outdoor and indoor.
